Re: Permit Boundaries for the Bingham Pit and the Copperton Concentrator, M/035/002 and M/035/011, Salt Lake County, Utah

Dear Mr. Fox:

Division staff and Kennecott staff met on January 7, 1994 to discuss the boundaries associated with the Bingham Pit, UCD Modernization Project and 4th Line Copperton Concentrator permits. We all agreed that refining the overlapping permit boundaries associated with these permits, would help to eliminate confusion and help in the efficiency of any future associated permitting.

Currently the UCD Modernization Project and Bingham Pit are both under one permit number M/035/002. The 4th Line - Copperton Concentrator is under permit number M/035/011. Because the UCD Modernization Project and 4th Line-Copperton Concentrator are related and more recently permitted areas, carrying a different form of surety than the Bingham Pit, we have elected to place these mine areas under the permit number M/035/011. This permit will be called the Copperton Concentrator to prevent any misinterpretation with other Kennecott Modernization Projects. The Bingham Pit permit, M/035/002, will remain the same without the UCD Modernization portion. It will, however, contain the crusher and a portion of the conveyor line associated with the Bingham Pit itself.

The 4th Line Expansion and the UCD Modernization Project include reclamation sureties for \$8,263,900 (ILOC) and \$5,300,000 (surety bond) respectively. These sureties will be placed under permit number M/035/011. The Bingham Pit surety, permit number M/035/002, will remain under the original 1977 Board Contract agreement.

The legal description and associated features for the Copperton Concentrator Permit, M/035/011, includes: (Don please fill in here)

PRELIMINARY DRAFT

The legal description and associated features for the Bingham Pit operation, M/035/002, includes: (Don please fill in here).

It is our understanding that Kennecott will provide the Division with new maps of the entire mining operation, including the new boundary areas for these two permits. The new maps are to be made available by Spring of 94.

The Division will move all pertinent DOGM permitting documentation into the appropriate mine files.

The Division appreciates Kennecott's efforts and support in making these changes.

Sincerely,

D. Wayne Hedberg
Permit Supervisor
Minerals Regulatory Program
